

(3). TITLE.:- FOUR-LEGGED POLICE.

Whistles where indicated by  
"W" on Screen.

Picture.:- These "canine cops" are rather different to  
one little de-er, dog I --

--could name, who, when ordered to do a thing, does  
exactly as he--

--likes ! XXXX They are trained --

--to obedience in this way - and soon become alert for their  
job of making --

--criminals wish they were plying their profession in a  
country where dogs--

--are not employed as a kind of auxiliary police force. XXXX  
They are taught to keep quiet, tee ! Not--

--a bark or snarl escapes them during school-time! XXXX  
Aren't they beauties ? XXXX

They only get three weeks of training before they are  
put to the task of preserving order. XXXX From all accounts  
they do that very effectively, tee ! XXXX So if, despite the  
Chancellor of the Exchequer's advice, any of you fellows should  
be--

--contemplating taking a trip to Germany, I should advise you  
to behave - unless you want --

--to be like the deposed M.P. - without a seat !

This fellow's name is Rip - you can guess why !!
