

(3). TITLE.:- TAILLESS AEROPLANE.

Picture.:- Captain Köhl seems to think the more--
--parts there are to an aeroplane, the more there is--

--can go wrong ! XXXX Perhaps he's right ! XXXX Anyway,
his new machine is entirely without a tail, and is claimed
to be the "last word" in safety planes ! XXXX

It is a strange looking contraption, and --
--provides the spectators with many a --
--thrill, as the pilot tests her, --
--all ways at once ! XXXX

I'm glad our dog isn't like Köhl's plane. XXXX
I like to know what mood he's in.; but how could I tell
if he hadn't a "rudder" !

Don't try one without wings, Captain !
