

C-1991851

-8-

(8). TITLE.:- HEAVY LOAD.

Picture.:- The officials of the Railway Company have a great load on their minds as well as on their rolling-stock, when they have to transport nearly four-hundred-tons of steel castings from Darlington to Haverton Hill, for shipment to Clydebank. XXXX The castings are just small sections of the great new Cunard liner--

--which is under construction. XXXX One piece alone weighs eighty tons - and just as if --

--that's not enough, our cameraman adds his weight to the load - so as to secure a better "shot". XXXX They had --

--to clear a double-track all the way because of overhanging pieces. XXXX I'm glad that long weight is over !
