

(4).

TITLE.:- OCEAN BUS.

Picture.:- It is nearly half a mile to the island. XXXX
Too far to walk, and too treacherous for boats. XXXX
Necessity--

--being the Mother of Invention, this wierd-looking contraption
was constructed, and now, the --

--passage can be made under comparatively comfortable conditions.
XXXX It has --

--a 28-horse-power engine which drives the tractor, through
the often-angry sea, back and forth between Bigbury and--

--Burgh Island, at threepence a trip. XXXX Locally, the
"Ocean Bus"--

--is known as the "Sea Beast", a polite version of some of
the--

--names it was called, on one occasion, when it stuck in the
middle--

--of the waterway, and marooned its passengers for an hour
or more ! XXXX It is a --

--useful affair. XXXX How about one of these for crossing
the English Channel ?
