

(7).

TITLE:- GAME OF SKILL.

Picture:- It is played with these weird-looking things !XXXX
The big--

--wooden bats are carried by the "fielders", who take up positions a hundred yards--

--away from the rails upon which is set the Hornuss, a boxwood--

--disc. XXXX At a signal the disc is driven off into the--

--distance, where keen-eyed watchers try to stop it.

Another Hornuss is sent away on its long, long, journey,--

--and the fielders try once more to intercept its flight.

Some are highly skilled in wielding the ash-rod, while--

--schindel-throwing isn't easy either !

Here you see one of the most expert players, putting through such a lightning shot that, out of a score--

--of fielders, not one manages to "kill" the flying disc. XXXX
They tell me the game has its own language - like golf !
