(7). TITLE:- LAND OR SEA.

Picture:- Mr. Lambert and his friend are out for a trip on the--

--Firth of Forth in his Hydro-car, as he calls it ! XXXX It is neither a boat nor a car - or rather it is both ! As a--

--roadster it can run straight from land into the water - and, hey presto !, it is a motor-boat ! XXXX It is quite a good idea. XXXX What a boon to the young man whose girl's mother objects to her daughter being taken--

--for a ride ! XXXX He just takes her for a sail, that's all ! XXXX

And if Mama objects to motor-boats - well, he simply sticks to the "broad high way". XXXX After a little--

--"run round" in the choppy waters of the Firth, Mr. Lambert decides to show us that his craft really will "come back to earth" after--

--a water trip. XXXX If this notion grows, we can expect to see ocean liners running up High Streets to pick up passengers at the motor-coach station. XXXX Every motorist will have to--

--improve his nautical knowledge - for each owner of a car will be the Captain of a boat ! XXXX Rather a "crafty" idea, what !
