(8) TITLE: INSECT SCOURGE.

Picture: Natives are in a panic, for the scourge--

--is on them ! XXXX They know their village is doomed to ruin by the awful pest, which--

--comes sweeping across the country in millions ! XXXX The--

--huts are deserted; the people hiding away from the horrible cloud. XXXX The--

--great mass of insects actually blots out the sun. XXXX Just imagine it, the vast wave--

--covers an area of seventy-five miles. XXXX Right from--

--the poisoned swamps of darkest Africa ! XXXX Each one of these--

--little specks is a grasshopper-like insect ! XXXX When the legions of destruction have passed--

--the whole countryside will have been devastated. XXXX They leave no life in--

--vegetation in the areas over which they sweep ! XXXX The great clouds travel--

--hundreds upon hundreds of miles, and only when the coast is reached, do they--

--end their orgy of destruction. XXXX Then, they fall--

--into the ocean, and provide the fish with a change of--

--diet. XXXX No doubt the fish--

--welcome them, but it is a terrible tragedy to all the poor devils who have to--

--live on the land over which the scourge has passed. XXXX

An astonishing sight ! XXXX We should be glad that such things do not come our--

--way - except by way of the cinema screen !

AND SO, FOR THE PRESENT, I LEAVE YOU !
