TITLE:- SUBMARINE TANK.

Picture:- It looks very much like an ordinary tank, which we have long looked upon as a sort of land battleship. XXXX
But it is quite--

--a different proposition ! XXXXX In addition to all the fighting qualities--

--of the old-style machine, including a land-speed of forty--
--miles-an-hour, she can, at the will of her crew,--

--be transformed from a land vehicle into a water vessel with wonderful possibilities as a fighter ! XXXXXX In she plunges, looking rather like a small submarine as she settles down to a little run up-stream, at--

--six-miles an hour ! XXXXX What a different tale Gallipoli would have been, had the Garden-Loyd "amphibious tank" been invented at that time! XXXXXXXX No terrible slaughter of infantry--

--as they attempted to wade ashore under a hail of enemy bullets, but just a number of these little water-tanks smashing their way through the defence with practical immunity. XXXXXXXXXXXXXXXX

Let's hope she'll do her bit towards stopping war before it starts !
