

(2). TITLE.:- LOOKING FORWARD.

Picture.:- She'll make the Graf Zeppelin look like a cheap Seveloy ! XXXX The inventor, Claude Freize, says--

--he'll be sending passengers by the hundred from New York to London--

--in one day, before he dies, - and he's 64-years old !

Her capacity is six-million feet of--

--helium gas, and her length a hundred-and-thirty feet--

--more than the Graf Zepp ! XXXX The big "V"-shaped deflectors will help her ride any kind of storm. XXXX

I hope you won't accuse me of "pulling your leg" - of course it's only a dream ! XXXX But Mr. Freize insists that it's not--

--a nightmare ! Well, some wonderful things have happened in our time - but there are one or two--

--people I'd particularly like to see go aboard for her first trip !
