

C-418314

(10). TITLE.:- HIGHER EDUCATION.

Picture:- The Freshmen have come to the University to learn, --

--and the Sophomores, (or second-year men), decide that they're just the fellows to give them their first "lesson".
XXXX And what a lesson it is ! XXXX The "Sophs" believe that every new man should know how to determine the -OUCH! - specific gravity of a body when immersed in mud ! XXXX

They give them a lesson in beauty treatment, too !XXXX
Real honest-to-goodness mud is supposed to be a good thing for the complexion (!), but --

it's surprising how many of them don't want to be--

--beautiful ! XXXX The class that puts most of "the enemy" into the--

--mud, wins - but they won't stay there to be counted !
Anyway, --

--a rough calculation has it that 58 Freshmen were dumped to 24 Sophomores, so the--

--Sophs are victors! XXXX And now for a clean up !
Oh ! STOP PRESS !

After a shower, they found that one of the Sophomores was a Freshman !
