HAIRLESS HORSES - Steeds for polo training
 are of an entirely new breed !
 -Cambridge.U.S.A.-

Picture. :- Polo ponies cost anything up to a couple of
 thousand pounds, but this one's worth about--

--half a dollar! XXXXX

It saves the real ponies--

--from getting many a crack on the legs. XXXX

If they get on alight they graduate to the electric
 pony, which gives them a --

--better idea of how hard it is to hit a ball while
 galloping down the field. XXXX This fellow is doing
 fairly well,--

--while "Ampere" his electric mount, imagines he is--

--going "all out" in a terrific dash towards the opposition
 goal !
