

BULLET PROOF GLASS - Inventor demonstrates  
newest idea in safety glass, at Toledo.

-Ohio, U.S.A.-

---

Picture:- Here is a married woman with complete confidence in her husband. You must believe it, because the camera proves it.

Watch the terrific impact of the bullets which her husband fires at the shot proof glass she holds.

She has courage all right, - but - er - just suppose ! It's a great invention, but if ever I have to stand behind windows made of that glass,--

--I shall still duck, if I see one coming !
