

GLAZED COIFFURES ! Dame Fashion decrees
sculptured tresses for "Milady of 1932".

-Chicago, U.S.A.-

Picture. :- Ladies study this ! Gentlemen sit back
and marvel ! Hair glazing--

--is coming into fashion. It stiffens hair in whatever
style--

--arranged, and stays put until the glaze is removed.
I haven't found out whether or not it leaves marks on
a black coat.

Neither do I know if it just bends, or breaks under
pressure.

But I am told that it prevents a lady's hair --

--from being easily touzled. In these days of "bright
young things", that will be considered an--

--advantage. This style makes hat buying unnecessary.
You grow your own hat ! I like it ! It looks much
nicer than the milliner's bills I get !
