

AIDS TO KNOWLEDGE - Rats reared in thousands
for medical research, at a Birkenwerder farm.

-Nr. Berlin-

Picture:- These are white rats ! I hasten to assure any
gentleman--

--who is doubtful about it, that these do not--

--belong to the same species as the pink ones--

--he saw after Boat Race night. They are real--

--honest-to-goodness rats, as clearly seen by a tetotalter
as they are be--

--me for instance !

As a matter of fact they are better class--

--rats, although one can see, not better behaved.

Ladies ! A rat in the hand is worth two on the floor !
You--

--know where the one is, but the others might be --

--anywhere ! These rats are bred for research purposes !-

--Stop quarrelling you two - and the action of drugs and
medicines upon them is carefully studied. This is extending
medical--

--knowledge. By the way, would any lady like this lot ?
