

-2-

A GREAT "COME DOWN" - Gigantic chimney-stack
brought to earth by high explosives near Runcorn.

-Cheshire-

Picture.:- Here's a nice piece of chimney ! Yards and yards of it ! Three hundred feet in fact ! Three years ago a girl of 17 climbed to the top of it ! Some climber that lass was !

Now it's unsafe !, (Looks as though the mice have been at--
--it), and has to be felled.

Cellignite cartridges are inserted at places carefully calculated, for the stack is near a public highway--
--and fired by an electric spark.

EFFECTS ONLY OVER NEXT SHOT.

Owing to a bad crack this piece was left standing. Like one of the ruins that Cromwell knocked about a bit ! If any handyman wants a few bricks, this is the place to call !
