

BY AIR TO THE RESCUE - Aerial patrol aids
life saving corps in thrilling rescue of drowning
bather.

-Miami Beach.U.S.A.-

Picture.:- The Miami Beach Air Patrol makes the round,
watching for trouble, and there is trouble !

A bather beyond his depth, but he's spotted !

The observer has seen him !

Quick action is needed !

A signalled message to the guards on shore and--

--the rescue boat is on its way. It's a race against time !

Every minute counts ! Down comes the life belt--

--from the watching airship !

It guides the boat to the drowning man, and not a
minute too soon !

With their man safely on board they pull--

--back to the shore, while the blimp goes away on her job
again.

This is the only air rescue patrol in the world. It--

--has already done lots of good work on this coast. The
victim is now revived by the waiting First Aid men, and
the list of rescues is--

--increased by one. Water wings for you, next time !
