TESTING THE JETS - Powerful new fire-float
proves successful in difficult trials.

-New York.U.S.A.-

Picture:- New York's riverside fires won't stand much
chance--

--against the powerful new fire boat. Jets of water thrown
by this mighty fire-fighter can rise to a distance of--

--hundreds of feet and reach heights hitherto impossible to
get at.

New York has been troubled by several disastrous--

--waterside fires, and insurance companies have had heavy--

--claims made against them, but this addition to--

--the army of precautions and preventions will reduce the
risk of burned-out--

--buildings. Five jets throwing tons of water like this--

--will turn most fires into a wash-out !
