

**SENSATION ! Universal cameraman risks his
life to take a fil, during a parachute descent !**

**Picture.:- I feel it a prillige to comment on this
story. It is one of the--**

**--greatest British thrills ever presented in any news-
reel, anywhere in the world.**

**This girl is (Be serious, please !) Miss Hazel
Wootton--**

**--and this is our own cameraman (Don't wink!) Mr. Frank
Purnell.**

**Miss Wootton has agreed to do a sky jump to prove the
value of her father's invention. She's to step--**

--into space two thousand feet above the earth.

**And UNIVERSAL'S cameraman is to do the same with his
camera, and film the lady while dropping to earth. Anyway,
that's the idea ! Such daring has never before been
attempted by a camera news-hound !**

**Off she goes ! A petite strapped-up parcel, packed
with oodlums of courage and thrilling with excitement.**

**How many modern daughters have such faith in the work
of their fathers - and this is her first jump she's only
fifteen years old. She knows that if successful she will
demonstrate Britain's--**

**--supremacy in air safety. Both planes are manœuvring for
position.**

**UNIVERSAL'S man crawls out for his part of this
hazardous feat.**

The girl has dropped first !

There goes our man ! Will the parachute open ?

CONT.

Will he get his picture ? He's actually deflating his apparatus to drop faster to get--
--level with her and work his camera.

He's got it ! Filming while dangling from a string a thousand feet up ! What's that plane doing ? Too near ! Much too near ! But he's cleared her, thank goodness !

Reading Aerodrome officials rush to help, but the Russell parachute doesn't let people jump to conclusions.

Ah ! Mr. Purnell grabbing his opportunity grabs the girl, too ! Bravo, Hazel ! You're wonderful !

As for our cameraman ! He says, it's all in his day's work !

AND SO, FOR THE PRESENT, I LEAVE YOU!
