FRENCH RAIL DISASTER - Eleven lives lost in
tragic smash at St. Just-en-Chausee.

-Near Senlis-

Picture:- French Railways don't have all the luck
they might ! This most recent disaster is a very
terrible one ! The death roll is at least eleven.
It's a tragic coincidence that this accident happened
quite--

--near to the spot where the R.101 ended her ill-fated
journey.

Whole railway carriages are--

--reduced actually to match wood and strips of twisted
metal,--

--scarcely recognisable for what they were a moment or
two before--

--the crash happened. In this carriage were happy people--

--returning home from a day in Paris. They are still under
the wreckage.

All this horror was caused by a broken axle ! Kismet !
