"DEATH RAY" TEST - German scientist in America demonstrates new device designed to end war.

-Chicago, U.S.A.-

---

Picture.:- This is the picture of the Laboratory of a German scientist in America. He claims to have perfected an--

--invisible ray which will burn--

--anything up at any distance. It will explode ammunition dumps everywhere, and deal withering death where ever it falls.

The ray is obtained by certain--

--chemical reactions which are at present the secret--

--of the inventor. He's now going to release the ray--

--on to this timber outside.

Watch it burn that up ! (Pause) That's how it works ! Jelly little plaything isn't it ?
