

NEW SUBMARINE - Latest addition to our  
navy. H.M.S. Thames, launched at Barrow.

---

Picture:- It's a sad coincidence that almost at the--

--same time that cheers rang out for the launching  
ceremony of the submarine "THAMES", the news came to  
hand--

--of the plight of the M.2. A feature of the THAMES  
is the number of improvements designed to--

--insure as far as is scientifically--

--possible the safety of the vessel, and of the  
hundred members of its crew.
