WATER UNDER THE EARTH - French abbot demonstrates remarkable claim to powers of divination.

-Near Paris-

Picture.:- Discovering by divination the presence of rare metals and water deep below the earth's surface, savours of the--

--supernatural. This French Abbot proves that--

--it can be done. Certain persons possess a magnetic influence, he says, which--

--causes agitation in articles held loosely in the--

--hand when passing over water and metals. After demonstrating with a pendulum,--

--he uses a twig. This girl is astounded as it twists of its own accord when--

--water is beneath. Is it magic, or what? Who can explain it?
