

BREAKS OF THE ROAD - Inventor claims speed of  
110 m.p.h. for cars of strange design.

-New York.U.S.A.-

Picture.:- The inventor of these weird looking--  
--things says they're the motor--  
--cars of the future. Well they--  
--look it ! This engine is twenty--  
--four horse power, and can go thirty-five--  
--miles to a gallon of petrol. The maximum speed--  
--is 110 miles an hour, so they say !

The little chap is nine horsepower--

--and goes forty-five miles to the--  
--gallon. Are they going or coming ?

With their long skirts I don't know if they run  
on legs or roll on wheels, but I don't think it matters !
