

WOMAN WAX-WORKER - Mrs. O.H. Strubergh

only one of her sex to run wax-figure plant.

-California-

Picture.:- Madame Tausaud has a modern rival in Mrs. Strubergh of--

--America. She's giving that lady a wiggling, and the lady is as patient as a plaster saint - well, a wax one !

Here's just how it's done ! First a thin--
--coating of plaster on the subject. In 20--

--minutes it hardens, and can be removed. The impressed cast--

--is then filled with melted wax which also hardens and there you are !

Ideal companions for quiet people, or perfect listeners for folks--

--who like the sound of their own voices all the time. There's Al Galpone, frightfully waxy about something!

Fancy seeing all this after a late birthday celebration ! Do I sleep ? Do I dream ? Or are things what they seem ? Oh ! Show me the way to go home !
