

ICEBOUND PORT - Cold "spell" causes
Danube to freeze over closing Bratislava
harbour.

-Czecho-Slovakia-

Picture:- Some of you wireless fans listen to the
Bratislava radio. Well, here is the town harbour !
Sudden frosts have chained the quick stream of the
Danube,--

--and closed the port with a barrier of ice.

Shipping transport between Czecho-Slovakia and
the Euxine --

--is paralysed, so the ice breakers start work. The
boats--

--is hauled along the ice border and rocked to chip
the edge and widen the channel. Rather --

--a primitive method, these days. These fellows
seem to choose between being icebound, or sea-sick !
