TRAP FOR RAIDERS - Mr. J. Duncan of Millbrook demonstrates his invention intended as protection against "hold-ups".

-Hampshire-

Picture:- One of these in the back-garden, and you'd catch burglars in bunches !

It works like this ! The raider steals in, and shouts "Hands Up !"

You put them up, of course, and pull the wire.

NOISE EFFECTS.

And that's what happens, says the inventor !

The raider jumps so violently that he lands in the next suburb, a reformed character !

I feel all of a tremble myself, dearie ! I think a bar - er - or two of music would be welcome !
