

C-80851

ROYAL INDUSTRIAL TOUR - H.R.H. The Duke of  
York visits a Bolton Mill and a pit at  
Atherton.

-Lancashire-

---

Picture.:- The Duke of York--

--arrives at Knowles' Peel Mill, Bolton, and aren't--

--the lassies of Lancashire pleased about it ! This is  
one call in the Duke's tour of Northern--

--industrial centres. He watches that marvel of mechanical--

--ingenuity, the spinning wheel; while the action of  
flashing shuttles is explained to him.

This royal visit is very stimulating to the cotton--

--operatives, who take it as--

--a sincere compliment from the Royal house. But the  
Duke must move on. His many engagements compel him--

--to keep to a strict time-table. This is his next  
call, the Gibfield coal pit, Atherton. The qualities  
of--

--the Duke and the coal combined, will--

--surely do much to keep the home fires burning !
