BABY-CARE FOR FATHERS - Male parents

learn to relieve their wives of some of the worries of motherhood.

-Ohio.U.S.A.-

Picture:- This is a sight to make strong men weep !
If--

--you fellows insist on being--

--fathers you may have to take these awfully consequences. An American hospital has started this instruction in how to be a motherly father.

Well, it had to be -

--done ! Mind where you stick that pin !

Isn't that splendid ? Every baby is the right side up !

It's easy to see they have never been fathers before,--

--and what a help they'll be when the twins arrive.

Mother is out dancing ! How pleased she'll be--

--when she comes home about two, and finds her little family all peacefully asleep like this !
