

DESERT YACHTING - Royal Air Force pilots

adopt sand-sailing as pastime.

-Abu-Sueir, Egypt-

---

Picture:- The boys of the R.A.F. in --

--Egypt have found a new way--

--to amuse themselves in their spare time. They have started--

--a novel sport - sand sailing ! These dry-land craft are fast and nearly--

--fool-proof. The wide front--

--axles give them great stability, and balloon tyres--

--make for comfort.

They may be adapted later for real desert transport. In one hour they will--

--go as far as a camel can in three days - - if the wind blows fair - - If not - wind-up !
