

C-922851

BY SEA TO UNDERGROUND - Tube railway
coaches shipped for new Argentine underground
system.

-Charlestown, U.S.A.-

Picture:- The Argentine doesn't know when it's well off !
The--

--wide open spaces tradition is getting lost. They--
--have built an underground railway, and here are --
--the cars being shipped ready to run immediately they land.

They are completely assembled and tested before
shipment. If--

--it interests you, they weigh 36 tons--

--each. The ship carries eight below decks and twelve--

--above. The scheme will transform Argentinian travel, and
perhaps the--

--travellers too ! But what will the films do ?,
If Argentinian Mexicans all--

--take to wearing bowler hats instead of sombreros and--

--travelling by underground instead of riding bucking
bronchos !
