SUBMERGED CITY - Excavations for
new park disclose ruins of ancient
civilization. Mesa Verde. U.S.A.-

Picture. :- Another buried city being unearthed ! The
famous cliff dwellings of the Navajo--

--Indians of North America who flourished in the 11th
century. It is surmised that an earthquake engulfed--

--this ancient city. Several shocks in this region
have been recently--

--recorded, so the excavators are taking a few chances
under that great shelf of volcanic--

--deposit. The buildings are of stone and by no means
as crude as one might--

--expect. The work is as full--

--of interest as a kiddies--

--lucky dip. There's a lovely little flat bowl just
coming up ! Unbroken after a thousand years ! Our
maid wouldn't believe that ! It just couldn't happen
nowadays !
