

252851

FOR THOSE IN PERIL - Fleet of fast tenders
(or reserve boats) delivered to Royal Air
Force at Hythe.

-Hampshire-

Picture:- The Air Force buys fast motor tenders, inaugurating
a new life-saving service. The boats will weather almost
any heavy seas and gales,--

--and are capable of a speed of thirty miles an hour.

High speed manoeuvres at Southampton show their
sea-worthiness, their mobility, and their general
performance to be far in--

--advance of anything previously used by any of the
services. They follow the design of the hydroplane--
and when speeding move on the surface of the water.
They will be stationed at the various sea-plane bases--

--round the coast, and overseas. In cases of an
air plane crash, or a ship's disaster, speedy rescue
work can--

--be effected. As many as 28 persons may be carried,
and--

--only one man is needed for navigation as the controls--

--are convenient and simple. A splendid addition to a
splendid service !
