"BLIND FLYING" - Miss Rosalind Norman demonstrates novel type of aviation at Heston.

---

Picture. By the instruments you see on the instrument board--

--in this plane aviators can now pilot their machines without sight.

This is known as--

--blind flying. Under instruction from Captain Baker, Miss Rosalind Norman is to do demonstration tests of--

--ability in this new air thrill. It puts the--

--"look before you leap" right out of date, doesn't it ! I'll bet she's not afraid to go home in the dark. The blind flier is covered entirely by a hood. All she can see is the instrument board!

EFFECTS SHOT.

The plane is now being flown blind.

EFFECTS SHOT.

Incidentally bombing planes will be able to fly in fog and find--

--their targets exactly say some cheefy officials of Whitehall.
