

138534-C

BRIDGING THE BURN - New concrete bridge
across the Tower Burn, at Dunfermline opened
by Provost Gorrie.

-Scotland-

Picture.:- Seventeen months of labour, and Dunfermline's
new bridge has reached its--

--birthday. It's across Tower Burn, an historic--

--stream connected closely with such names as King--

--Malcolm, and Robert the Bruce who made spiders famous.
The cord is cut - - - by the Provost's wife, who receives
a bouquet presented by Twa wee Bairns o'the toon.

COMMENCE PIPER BAND.

The ancient bridge which first spanned this stream
now lies over--

--60 feet below the roadway.

BAND UP TO FULL FOR THIS SHOT.

The building of this bridge is the most important con-
structional work--

--ever undertaken by the Borough. Dunfermline's
civic governors evidently stand for progress.
