

138528-C

A NEW COAT - Workmen commence six-months  
task of repainting the famous Eiffel Tower.

-Paris-

---

Picture.:- Even the most ambitious painters seldom  
rise so high--

--as those who do this job ! The eight artists who  
carry out the renovating of the Eiffel Tower--

--are really artists - - acrobatic specialists. They  
are paid a--

--high salary - - 40 francs per hour, and are not covered  
by insurance. The work takes some six--

--months, and 35 tons of paint. This is what one sees  
going up in the lift ! The top--

--is one thousand feet up and in a high wind it--

--has a swing of three feet. If it didn't swing, it  
would break !! There's not much chance of these men  
going--

--to sleep on their job. Do you notice those aerial  
insulators ?

This fellow looks pleased, but one slip and he's picked  
up in a basket ! Brrh !

Still, the pay is good, but is it good enough. Not  
for me !
