A FORTUNE IN FROGS - Business booms in new  
venture of enterprising Californian farmer.

-U.S.A.-

---

A backyard puddle started the idea which turned this--  
---- hobby into a business and made its owner a small  
fortune-----  
-----the frogs spawn is very delicate and has---  
----to be very carefully transferred to the hatcheries, where  
the sun can keep it warm. In about three days it----  
----hatches into tadpoles. Those big ones are about nine---  
----months old and in five years of easy living they are  
this size. Squidgy juicy fellows-----  
----- like chorus girls they are famed for their wonderful  
legs. They are-----  
----- no ordinary frogs. That's enough in you pop--  
----and dont they make a splash, the fat old things---  
----sixty million a year are bred and sent to---  
---market. Smooth and fat as a baby's face---  
---If they---  
----get any bigger why, they'll have to be saddled.

-----
