

C-285851

THEIR LAST PARADE - U.S. war tanks give  
thrilling display prior to removing to new  
station.

-Fort Geo.G.Meade-

---

Picture.:- This might be a picture of fabulous  
monsters advancing to attack an enemy while  
belching fire and poisonous fumes from their  
reeking nostrils - - but it isn't ! It's  
a review of a tank regiment ! All these  
mechanical demons were built for service in  
the Great War, but no--

--one was sorry that the Armistice was signed  
before--

--they were shipped. They are now--

--obselete. Useful for training purposes, but  
no good for--

--real war service. You see war methods have  
improved--

--so much since then. Many more people can be - -  
er - - dealt with in--

--a much shorter time. But even--

--now these tanks can get--

--through most difficulties. They don't wait for  
doors to be opened. They just walk--

--right in.

EFFECTS OVER 4 SHOTS.

Hot work that ! Especially for the man inside !  
Never mind, my lad ! The canteen is open and wet !
