H.M.S. COURAGEOUS - Universal Talking News presents  
with pride exclusive pictures of activity aboard  
the mighty aircraft carrier. -Off Invergordon-

---

Picture. :- For these special pictures of the work of His Majesty's aircraft carrier Courageous we are--

--indebted to the Admiralty, and the Ship's Commanding Officer. It has been possible to secure these special shots only with their--

--generous co-operation.

EFFECTS OVER REMAINDER OF THIS AND  
TWO NEXT SHOTS.

Nine torpedo bombers have just taken off for a practice attack on--

--the carrier. I expect you say the dummy torpedoes slung underneath them.

After the attack the bombers return and wait for the signal to--

--land on the carrier. Sir Bolton Eyres-Monsell took the air during this practice. Specially trained men stand by to receive the returning craft, and landing accidents are extremely rare.

SHORT EFFECTS SHOT.

A destroyer is always in attendance on the carrier, ready to deal with any flying accident or emergency. The efficiency--

--of the Service is such that--

--it is seldom their aid is called upon.

The deck looks pretty large from here, but--

--not large enough for me if I were--

--up there !! It's a nice deck if you don't miss it ! This operation of receiving aircraft is carried out nine times without a hitch.

-2-

Each one is guided on to its private lift, pushed  
nicely to bed and--

--tucked up by the clever young sailormen !  
They're good at things like that ! Handy  
men !
