PLAYING AT LESSONS - School authorities introduce novel method of teaching geography to the youngsters.

-Grants Pass.U.S.A.-

---

Picture:- Geography made easy ! These children carry whole States on their backs,--

--and know just where they fit into the American Continent !

The theory is that children learn more easily by illustration than by--

--dry map study. In a matter of a few seconds the jig saw puzzle--

--of North America is correctly solved. This method makes work more like--

--play. It makes the kiddies actually eager to start lessons ! A--

--clever psychological inducement to acquire knowledge ! It's rather a big atlas for--

--them to carry about, but many hands make light work !
