GREAT CATTLE DRIVE - Sole survivors of  
longhorn herds end march from Mexico to Texas.

-U.S.A.-

---

Picture,:- These cattle are all that are left of hundreds  
of thousands of the--

--famous Texas breed of longhorns. They have been rounded--

--up by a big--

--rancher, so that the parent breed which made--

--Texas an important cattle country won't disappear entirely.  
The law demands--

--that all beasts brought across the border must be  
dipped whether they like it,--or--

--not. They don't like baths,--

--but take them just because--

--they have to ! If Lasea ever existed,--

--it was the stampede of a herd like this which killed  
her. By careful mating and rearing the owner hopes to--

--re-establish the importance of the longhorn herd and  
recreate its glories.

Anyway, successful, or not, this is the last time  
they will walk through a city for a lot of years, and I  
don't expect the citizens will mind that.
