"SHOOTING" A CITY - Flying cameramen complete  
world's largest aerial map. -New York-  
-Exclusive Pictures-

Picture.:- Here is some map making extraordinary !

The plane is specially built for the--  
--job of putting New York on the map in the real sense of  
the word !  
At 20 thousand feet the clouds--  
--roll away, and the city below is ready to be mapped. The plane  
is--  
--now travelling at eighty-five miles--  
--per hour. The machine finds its photographic level and the--  
--work commences. The financial centre of--  
--Wall Street is directly below. A--  
--bomb loosed now would cause more than a financial--  
--panic. With the special camera and film--  
--used, every building from the--  
--flattest shed to the tallest structure will be--  
--clearly shown on the--  
--finished map. From this angle one can see where the  
ultra-modern artists get their ideas of perspective. The  
giant structures themselves seem to move when the plane  
sways slightly. The harbour looks like a--  
--child's pond. Enlarged--  
--prints are made from--  
--the film which, when developed, fit exactly into the --

"SHOOTING" A CITY -

--complete map, which, by the way, is one of--

--the largest ever made. When the--

--new kind of practical--

--jig saw puzzle is put together, the city again--

--lies beneath us, but there's more time to examine it  
now ! Another of UNIVERSAL'S wonderful exclusive  
pictures of modern marvels !
