MAKING MONEY - U.S.Mint turns old silver coins
into brand new "quarters" of 1932 mintage.-Philadelphia

Picture:- It's a change to see a place which is really making
money ! New money--

--for old is the slogan of this business.

Worn coins are thrown into the--

--furnace and turned from liquid wash into just liquid metal.
From this molten metal new coins are--

--made for American sugar daddies--

--to hand on to their sweeties !

The moulded ingots are put into--

--the rolling mill and under-terrific --

--pressure are--

--squeezed into the correct thickness. Nice--

--long strips of--

--90% silver all ready for the punching machine which--

--cuts out the--

--blank discs. After that the blanks--

--are fed into the--

--stamping machine--

--which makes the heads and tails--

--and mills the edges at the--

--same time. Take a--

--good look, so you may--

--recognise it when you get any.
