FIRE AT SEA - Fire-fighters risk
their lives in great battle with
blazing oil-tanker.
- Gulf of Mexico -

Picture:- There's plenty of water here but it cannot
extinguish --

-- the fire which has broken out aboard --

-- the Ronny Warner. The's an oil tanker with a full
cargo.

One terrific explosion rocked the air and the --
-- good ship was turned into a bon-fire.

Tons of crude petrol are under her decks --
-- and the firemen have to face the possibility of --
-- another violent explosion which would --
-- destroy everything within reach. The adjacent Mississippi
water-side --

-- is alarmed. If the oil got through it would set --
-- the whole river on fire -- but the fire fighters from
New Orleans, pluckily stick to their --

-- job and manage to confine the blaze to a comparatively
small area. The damage will run into --

-- many thousands. The cost of a valuable ship and cargo !
