

READY, AYE READY ! Troon lifeboatmen demonstrate
life-saving by breeches buoy apparatus, at Gourack.

-Scotland-

Picture.:- That is an alarm flare, calling for the--

--lifeboat, but you're not going to be--

--very thrilled. It's only a demonstration. No one
is going to be really, or nearly drowned ! First
the breeches buoy is sent and hauled--

--aboard. One of the boat's crew takes a--

--chance, dons the apparatus, and is hauled over--

--to the waiting lifeboat. As I said, it doesn't
appear to be a very thrilling piece of rescue work,
but during a storm at sea those breeches are very
popular wear for both sexes.
