

"THE TEMPEST" - - Shakespearean players enact the
unforgettable comedy in a natural amphitheatre on
the rocky Cornish coast. -Perthcurno-

Picture.

Amongst these beautiful and awe-inspiring rocks, gifted amateurs play Shakespeare's last comedy "The Tempest".
The booming--

--of heavy breakers from the Atlantic mingles with the words--

--of Ferdinand, as he tells the story of their wreck upon the rocks,--

--and incidentally meets the lovely Miranda - - the unholy Caliban, born of a witch, and--

--Prospero, his magician master. Ariel, and Puck the Island's sprites are all here to enact the--

--magic of Shakespeare amid the magic of nature. These pictures were taken by moonlight eleven miles from--

--Penzance. The modern steamer in the distance rather--

--spoils the illusion, but the novel presentation of the famous play is an artistic effort worthy of some praise.
