

"WATERING" THEIR MOUNTS - Men of the Southern  
Command teach their horses to swim narrow streams.

-Near Weymouth-

---

Picture:- Even horses have to be made to swim ! As  
a rule they learn--

--quicker than human beings, which is, perhaps, just  
as well ! Fancy trying--

--to explain to a horse how to do the breast stroke !  
While they watch, their--

--friends are being forcibly towed to deep water and  
then ducked ! The--

--rest wonder, and patiently wait their turn ! They--

--may not like it at first, but they've got to do it !  
Army horses must--

--get used to crossing rivers willingly ! After once  
having been towed over, the novices don't mind swimming  
back again ! In fact they--

--soon begin to like it !, which all goes to show that  
you may lead a horse to the water, and you can make  
him swim !
