"JUMPING JUPITER !" First tests of wonder-tank capable  
of leaping 12 ft. trenches !

-Linden, U.S.A.-

---

Picture.:- Things move quickly in--

--the American Tank Brigade ! ..... The last word in  
mechanised--

--mobility travels at over--

--a hundred miles an hour on the straight !

... Telegraph poles almost look like slats of a fence,--

--and milestones like a graveyard,--

--at that speed ! ...

But that's nothing ! ..... Wait till you see what it  
can do--

--on rough ground ! ..... First they attach a caterpillar-  
tread. .... This will reduce the speed, but so would a  
twelve-foot--

--trench ! .....

They have nick-named this machine--

--"Jumping Jupiter" - - - a good name, too !

--- Ow ! -----

You might call this "taking things easy." !

... Hope they've got cushioned seats inside. ....

Anyway, the tests are a "bumping" success !
