MISS AMERICA X - - Gar Wood, the American speed-boat
pilot, takes his new craft for a trial spin at Algonac.

-Michigan-

Picture:- It looks rather like a water taxi, from this
angle; but it is the engine of Miss America the Tenth.

... Gar Wood is after the world's water-speed record,
held by our own Kay Don. Wood puts her along--

--at sixty, by way--

--of just "running her in". Miss America weighs
seven-and-a-half tons,--

--has forty-eight cylinders, and a petrol--

--consumption of five-gallons to the mile !

Just think of that, you small-car owner !
After a few runs,--

--Gar Wood expressed himself as perfectly satisfied
with Miss America's performance. He has got
to be more than that if he is to regain for U.S.A.
the world record. The British bull-dog has
got its teeth in that record, and--

--Wood will have to "go some" to get back !
Well, we shall see !
