SLOW MOTION - - Competitors in ca' canny race  
find crawling more difficult than speeding.

-Paris-

---

Picture:- Most races are strenuous tests, but this--  
is the laziest race ever run ! The slower you go the  
more likely you are to win !

The course is the ascent of--

--Montmartre Hill, Paris. The rules are that the rider  
must not touch the ground, his engine must not stop, and  
his direction must be as straight as--

--possible. That old wind-mill at the top of the street  
is more attractive than the race. This type of racing  
has no--

-- dangers, but it has its difficulties. An extra  
wobble, an instinctive foot out to restore balance,  
and--

--you have lost the race. It is a tame affair for  
the Continent, but it's amusing ! I am sure business  
houses will suspect--

--their messenger riders of practising for this race  
while on express errands. Curious too, that--

--such a race should be a Paris event. Well, anyway,  
they--

--are the slowest sporting Frenchmen ever recorded.
