NECESSITY - - THE MOTHER OF INVENTION - - Unemployed

man develops an ingenious idea for making money.

-Oregon.U.S.A.-

Picture.:- An unemployed car-owner finds a new way to--

--make money. During the warm season, he got permission to stretch cables across the Pudding--

---River, Oregon, removed the tyres from his--

--car, and in no time had --

--an overhead bathing service running.

A top cable stops--

--the car from turning over into the river below.

He charges ten cents a--

--time and can make--

--nearly two thousand trips on one--

--gallon of petrol. That's about - - oh - - er - -
umpten hundred--

--percent profit, and saves tyres and temper !
Just shows you how sunshine and a bright idea
can change a man's luck !
